5. Exercise sheet
Hand in solutions until Monday, 19 June 2017, 10:59

Exercise 5.1 (Project, part 2). (4 points)

Read and grade the your neighbour team’s solutions to exercise 4.1. In an email you get access data to the respective solutions.

A major point in this task is to learn more about a further system.

Study the other’s solutions and judge how well they were able to explain the respective system. Ask:

- Is it easy to read?
- Is it understandable?
- Does it tell the right things?
- Does it come to the point?
- Does it convince?
- Is it correct?
- Are references given and used?
- Are the tasks from exercise 4.1 solved?
- Does the solution go beyond?
- Does it teach you how to present or how not to present a topic?
- What have you learned regarding content?

Meet as a team and discuss.

Individually, explain briefly your observations and report credits.
